

# DC Media Desktop Edition Premised Based Solution

**Total Network Management**  
**Powerful Content Scheduler**

## 36 Content Formats Unlimited Potential

This version of DC Media installs on a local desktop, server or in a shared virtualized environment. Multiple install instances can share the same database in a multi-user environment & does not require any external server access. Internet Access is required for RSS/XML feeds.

### CONTENT GATHERING

Create Digital Signs using the DC Media content Authoring tool. Or Simply load any of 36 different content formats and construct your Display.

### SCHEDULE AND DISTRIBUTE

Build a playlist and schedule the time, duration and any other timed or triggered formats. Hardware interactions can also be scheduled at this stage. Then publish using a drag and drop interface.

### MONITOR AND REPORT

Use the Network Manager to monitor any number of screens, receive alerts and retrieve Proof-of-Play. All the tools you could possibly need for a live media network.

A Complete Turnkey Digital Signage Software Solution, easy to use, you can create engaging displays, then deploy to your Network using drag and drop.
